# Metal Free Certification

AHN tips, filtertips, PCR-tubes, PCR-stripes, micro-tubes, cryo-tubes, filtration plates and filtration tubes from AHN Biotechnologie are injection moulded from autoclavable, non-wetable, premium grade, virgin polypropylene on state of the art equipment in accordance with ISO 9000 and DIN standard procedures. Only high quality, low adhesion, polypropylene are used for AHN products. Our relentless pursuit to raise quality creates products that are always evolving to a higher standard.

## Guaranteed absolutely Metal Free

Only high quality, low adhesion, polypropylene is used for AHN Biotechnologie precision tips and tubes. Furthermore, all dyes used for our coloured tips and tubes are guaranteed absolutely metal free! So even our „blues“ and „yellows“ are metal free, eliminating the risk of sample contamination by trace elements.

Our strict quality control system, according to ISO 9001-2000 and the German DIN 12650 standard for pipette tips, is certified by the official German H-sign.
